Skills

Core Development:

Java8+, J2EE, Spring Boot, Microservices, RESTful APIs, API Gateway, Eureka, Reactjs, microfrontends

AI & ML: Gen AI integration, Google vertex AI, Agent development

Cloud &

Containerization: Docker, Kubernetes, GCP

Messaging & Streaming: Kafka, RabbitMQ

ORM & Data: Hibernate, JPA, MySQL, NoSQL

DevOps: Git, Maven, Agile, Code Reviews

Certifications

- Neo4j Certified Professional (Neo4j)
- Kafka & Zookeeper Certification (Scaler)
- Spring Security Certification (Amigos Code)
- IBM AI Engineering Certification (Coursera)
- Full Stack Java Developer (Udemy)
- Google Cloud Compute Engine (Coursera)

Education

B.Tech, Computer Science

College of Engineering Kalloppara (KTU), Kerala (2017-2021)

Professional Summary

I am a **Software Engineer** with over **4 years** of experience specializing in high-scale **Microservices** and **AI-integrated applications**. Proven track record in architecting healthcare solutions using **Java**, **Spring Boot** and **Reactjs**, with expertise in **Gen AI agents** and medical imaging standards. A hands-on engineer skilled in guiding cross-functional teams through the full SDLC, from defining technical roadmaps to deploying cloud-native architectures. Committed to performance optimization and the strategic implementation of emerging technologies to solve complex clinical and business challenges.

Experience

Trenser Technology Solutions(P) Ltd | Trivandrum

Senior Software Engineer (May 2025 - Present)

- **Led the end-to-end architecture** of an AI-driven X-ray reporting viewer, leveraging **Python AI agents** and **Google Vertex AI (Gemini)** to automate clinical findings, reducing radiologist manual documentation time by **70%**.
- **Engineered high-throughput microservices** using **Java Spring Boot** and **dcm4che** to orchestrate DICOM operations (WADO/STOW), successfully migrating **100k+** medical studies to **Google Cloud Healthcare API** stores.
- **Built a Cardiac Echo Viewer** using a **Micro-frontend** approach using **Reactjs**, increasing modularity and enabling the seamless integration of **US2AI** analysis via iframes.
- **Optimized legacy data migration** by developing **Spring Data** ingestion pipelines that parsed complex PDF/CSV datasets, improving data processing reliability and population of **PostgreSQL** tables.

Adeptus Technologies LLC | Remote

Software Developer (Jan 2024 - May 2025)

- Upgraded the application from **Spring Framework** to **Spring Boot**, reducing deployment time by **40%** and cutting maintenance overhead.
- Developed an **AI-powered bill processing system** using **Tesseract OCR**, increasing workflow efficiency by **20%**, reducing manual data entry efforts by **30%**, and cutting processing time by **50%**.
- Led the migration from **Solr & Cassandra** to **ElasticSearch & Apache Druid**, improving query performance and reducing system downtime by **25%**..

Jr. Software Developer (Nov 2021 - Dec 2023)

- Collaborated on a facility management system supporting 500,000+ IoT devices, developing backend services using **Java**, **Spring Boot**, **CassandraDB**, **Neo4jDB**, and **Solr** to improve API performance, and building **ReactJS** and **AntD** components to enhance UI responsiveness and reduce load times.
- Worked with Apache Karaf, Flume, Flink, and Kafka to support distributed, real-time data processing of millions of events per second, and helped deploy Kafka on Docker and

Projects

Student Sem Registration Portal (PHP, XAMPP, MySQL) - [GitHub](#)

- Developed an **online exam registration system**, reducing manual workload and improving student submission efficiency.
- Deployed the site on the college local infrastructure so students can use the service

ECommerce Platform Microservices (Spring Boot, Spring Cloud, MySQL, Hibernate, Redis, Razorpay Payment Gateway, Stripe Payment Gateway, JUnit, Kafka) - [Scaler](#)

- Architected a Microservices based ECommerce Platform with functionalities like Login, Authorization, Product Catalog, Payment Gateway Integration, Service Discovery, Notification Service etc.
- Deployed whole Ecosystem on AWS Elastic Beanstalk leveraging RDS for Data Persistence, CloudWatch for efficient Logging and Monitoring
- Implemented Event Driven Email Service using Kafka to allow sending emails at large scale across different services within the Platform.
- Implemented powerful sorting, filtering and paging to allow for efficient discovery of products.
